The New dual purpose super stylish Komet

The latest 4 berth Komet is probably the most stylish Volkswagen conversion ever produced in Britain. Unlike some competitive conversions it combines beauty with excellent aerodynamics and great practicality, as within the roof is a full sized 6' 0" x 4' 0½" high level double bed with excellent headroom, plus ventilation to match with a multi-directional opening roof light with flyscreen, and two opening high level double glazed windows.

Not only does the Komet sleep four adults in comfort and privacy in two full-sized double beds, it also features two dinettes with two centre leg tables, a flush toilet, fitted crockery, swivels on both driver and passenger cab seats, and has a stainless steel roof rack and ladder – **all** as standard equipment.

Like other Volkswagens converted by Autohomes, the Komet has a fully insulated caravan body, mains electric hook-up, enamelled sink and cooker/grill with toughened glass lid, and a 2 cubic feet (gross) Electrolux refrigerator* (gas/12 volt/mains) with freezer compartment and electronic ignition. A useful new addition is a dash top console for storage of small items.

More than adequate general storage facilities include crockery and bottle storage, wardrobe, cupboards, lockers and drawers. The two large drawers over the engine simply lift out for easy servicing.

Safety features which are fitted as standard equipment include rear seat restraint straps, flame failure cut-out on the cooker burners, isolating gas taps for each gas appliance, and an earth leakage and overload circuit breaker on the mains electric hook-up. Although it is not a legal requirement for motor caravans, the caravan upholstery has fire retardant foam.

Both the roof ribs, fitted by Volkswagen, are left intact, thus maintaining the structural integrity of the vehicle.

The new Komet is not only a superb dual purpose vehicle for everyday motoring, but with its luxurious new soft furnishings and new top quality furniture it also makes an ideal home from home for holidays and weekends away!

*Electrolux British made refrigerators are used exclusively in all Autohomes.

Kameo & Kamper

In addition to the new Komet, Autohomes have also introduced new Kameo and Kamper models based on the Volkswagen Transporter. Both share many features with the new Komet including the same luxurious soft furnishings, the same top quality furniture and the same striking exterior graphics.

The Kameo, which was specifically designed for two people (although a child's cab bed is an optional extra) has an aerodynamic low-line fixed roof with built-in roof rack, which nevertheless, provides 6' 2" of interior headroom. The spacious and luxurious Kameo surely represents the best value-for-money Volkswagen based motor caravan on the market today!

The six seater, four berth Kamper is one of the most popular motor caravans of all time, and features a multi-position, sliding, swivelling and reclining seat behind the front passenger seat which converts to a single or double rear facing seat for dining or a single forward-facing seat for travelling complete with restraint strap. In all, the Kamper can seat six adults in forward facing seats which is more than can be said for most cars!

The Kamper is *still* the only Volkswagen based conversion with a double skinned, fully insulated, rigid elevating roof that locks down automatically and, when elevated, provides full headroom for the high level 6' x 4' double bed, which in conjunction with the extra wide lower double bed allows four adults to sleep in comfort and privacy.

The patented elevating roof not only provides security, but also helps protect against extremes of heat and cold, condensation, and avoids the 'wind flap' associated with fabric elevating roofs. The roof is easily elevated with assistance from gas-filled struts, and a roof light with built-in flyscreen provides variable ventilation. For even greater ventilation in hot weather, or for superior viewing at sporting events, one of the sides can be folded away without affecting the stability of the roof to provide you with your own private grandstand!

**New Komet, Kameo and Kamper for the best
in Volkswagen based motor caravans!**
