

# A HOME IN THE RANGE

Fiat Pandora

Trailblazer

Volkswagen  
Kombi Kamper Mk II

Travelhome S

Motorhome Mk IV

Talbot Excalibur

Britain's most advanced motor caravans!  
Autohomes is Britain's leading motor caravan manufacturer and has been making motor caravans for over 20 years. Not surprisingly the latest range represents the most advanced motor caravans ever to be built in this country.

The conversion models – Pandora, Trailblazer and Kamper – feature rigid, double skinned, insulated elevating roofs – a unique feature that helps protect against extremes of heat and cold and avoids the "wind flap" associated with fabric elevating roofs. The

Volkswagen Kamper Mk II and Fiat Pandora models both have high level upholstered double beds in the roof, and the remarkable Pandora roof increases the interior space of the economical Fiat Citivan by an amazing 76%. The revolutionary new front wheel drive Excalibur, the Motorhome Mk IV and the Travelhome S coachbuilt bodies, including the floors, are constructed from panels manufactured by the vacuum-bonded styrene sandwich principle which guarantees a structure that is immensely strong and light with superb insulation qualities. All are designed for long term touring in all climates.

All Autohomes meet all the safety and engineering requirements of the respective motor manufacturers, and all gas appliances are fitted in accordance with the manufacturer's instructions. Only "completely safe" heaters are fitted.

We back all our products with a first class after-sales service in terms of warranty, parts supply, repair facility at the factory, and with Britain's largest network of specialist motor caravan dealers. Need we say more?

# STILL THE ONLY VOLKSWAGEN CARAVAN WITH A RIGID, FULLY INSULATED ELEVATING ROOF

The original Kamper based on Britain's best selling motor caravan base – the Volkswagen Transporter Kombi – was hailed by the Press in euphoric terms. Now the Kamper Mark II takes the original and highly successful concept of a true dual purpose vehicle equipped for either summer or winter use a further great step forward with a vast number of improvements for 1983 including new interior decor, increased storage space, more comprehensive kitchen facilities and a much simplified method of converting the rear seat to a double bed.

Standard equipment includes an improved and totally unique rigid, double skinned and insulated elevating roof to help protect against extremes of heat and cold and to avoid the "wind flap" associated with fabric elevating roofs, gas/12 volt refrigerator, built-in 12 gallon water tank, and a roof rack. A flush toilet and a completely safe "blown air" caravan heating system are optional extras.

The Kamper will seat up to six people in forward facing seats, sleep four adults in comfort and privacy in two upholstered double beds and will also convert into a roomy estate car.

See the exciting new 1983 Kamper Mark II at your dealer now!

Official Converters of the Volkswagen Transporter Kombi
